To whom it may concern,

Company Name: Nichi-Iko Pharmaceutical Co., Ltd.

(Securities Code: 4541, Tokyo Stock Exchange)

Representative: Yuichi Tamura, President & CEO

Contact: Hiroshi Mogami, Director of Corporate Communication Dept.

Partial Delay in Supply of Products Manufactured by the Toyama Plant 1

Nichi-Iko Pharmaceuticals Co., Ltd. ("Nichi-Iko") has resumed its production and distribution of the pharmaceutical products manufactured at the Toyama Plant 1, in accordance with our continuous detailed quality assessment of all products using FMEA* etc. and upon continual consultation with regulatory agencies, as we notified in our press release dated April 6, 2021 titled "Notification of Resumed Operations for Manufacturing and Distribution of Pharmaceutical Products by Nichi-Iko and for Manufacturing of Pharmaceutical Products by the Toyama Plant 1". Due to these intensive and extensive activities, Nichi-Iko regrets to inform that the size of our manufacturing and product release at the Toyama Plan 1 may not align with the speed of consumption of inventory. Therefore, as of today, there is a possibility of a delay in the supply of the 164 products as attached.

Please refer to the attachment for the status of each individual product in detail. We will update the results of the quality assessment as well as the expected timing of our resupply of these products on our company website, as required and accordingly.

We deeply apologize once again to all stakeholders, including patients, their families, and medical personnel for causing any concern or inconvenience. We will thoroughly comply with laws, ordinances and related pharmaceutical regulations, and as a company that provides pharmaceuticals contributing to the health of patients and their families, all board members and employees of the Nichi-Iko Group are determined to seriously and sincerely engage in recurrent prevention measures and quality improvement activities and to make every effort to regain trust from all people.

We will disclose the impact on our company consolidated performance due to this issue judging the ongoing progress as necessary and accordingly.

* FMEA (Failure Mode and Effect Analysis) is a technique to eliminate or mitigate risks as much as possible in advance by evaluating risks inherent in a product and/or process from its product and/or process design phases. Even ICHQ9 recommends FMEA as a risk evaluation method and it is widely used for risk assessment by pharmaceutical companies.
